

PESA SA Field Trip

Neoproterozoic Periglacial, Turbiditic and Deltaic Sequences of the Adelaide Coast.

Sunday 1st November 2026

Rhodri Johns and Elinor Alexander will guide us through a one day traverse of the Neoproterozoic succession exposed along the Adelaide coast, from Marino in the north to Ochre Point in the south. The section records the transition out of a snowball Earth at the close of the Marinoan glaciation and into the early Ediacaran.

Seacliff Sandstone

PESA Members: \$20. Non-Members: \$30. Students (limited places): no charge

Self-drive field trip – carpooling encouraged. BYO lunch.

Book and pay online at www.pesa.com.au
